

Instruction

Step 1: Cut all pieces according to the pattern shows and oiled.

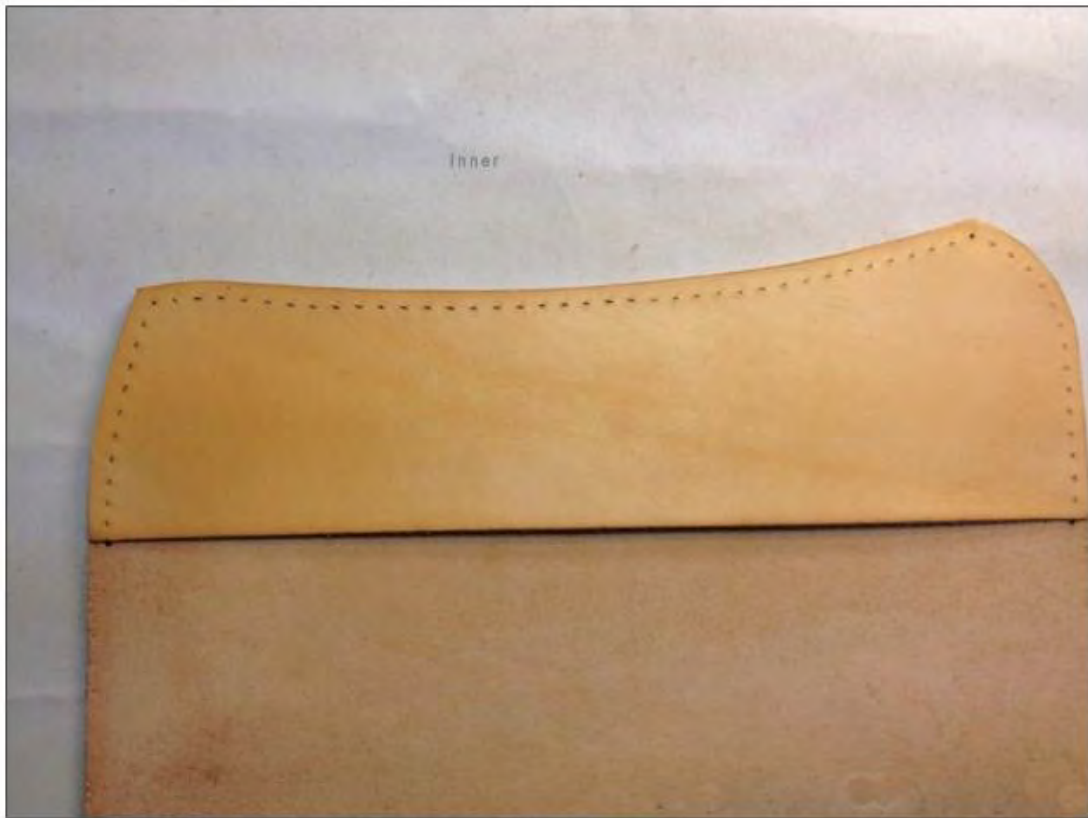

Step 2: Paste the Surface and Surface strengthen leather and punch holes with your diamond chisel.

Step 3: Punch holes on the Coin purse leather.

Please look at the inner side(opposite side) of the coin purse bag, the strengthen leather has been pasted on and punch holes together.

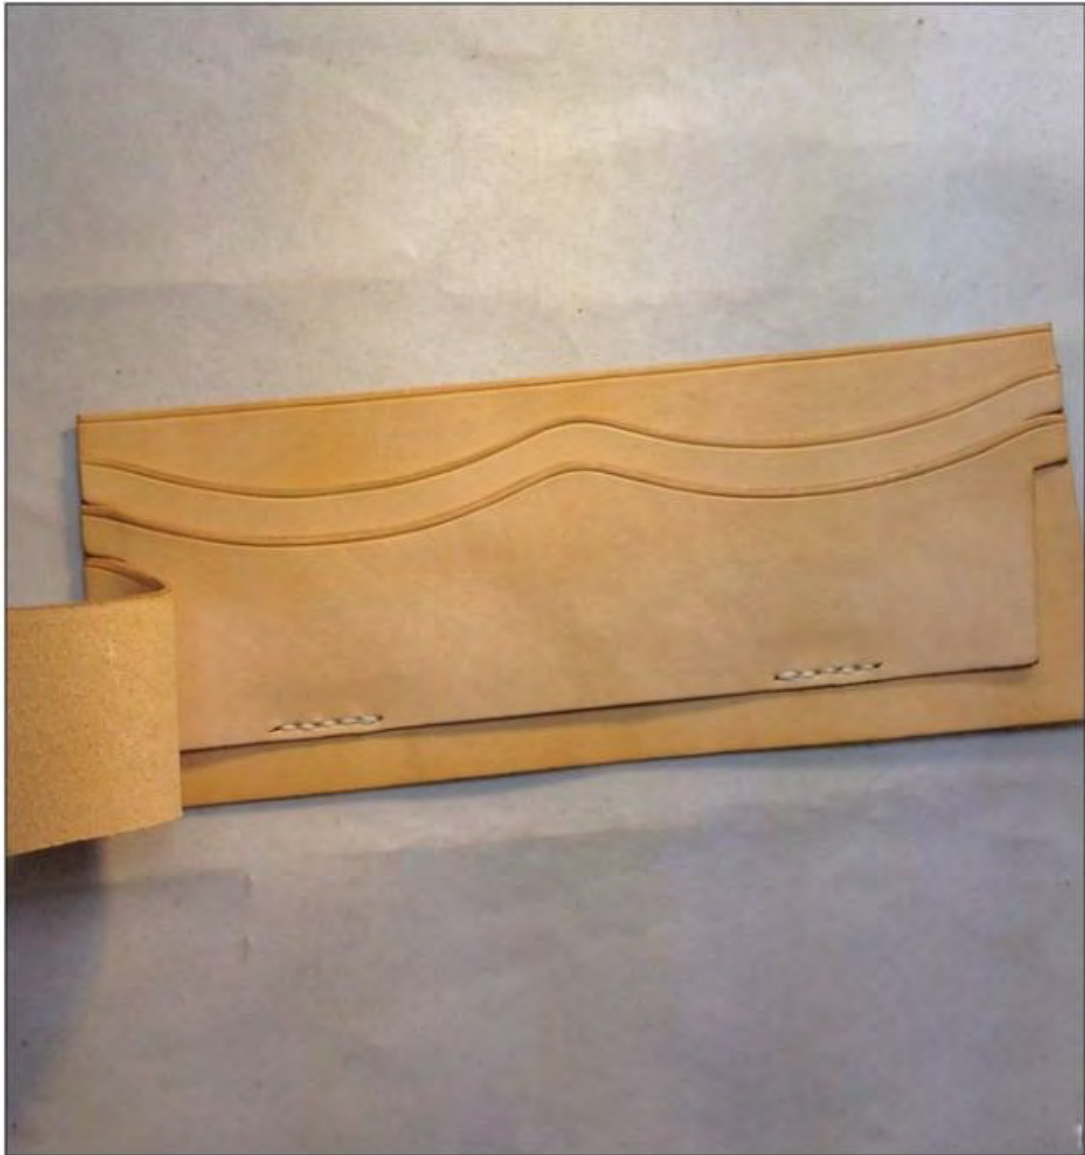

Step 4: Then you can sew the punched parts together. Grind and polish the edge, what's more make decoration lines J that will make the wallet looks very charming!

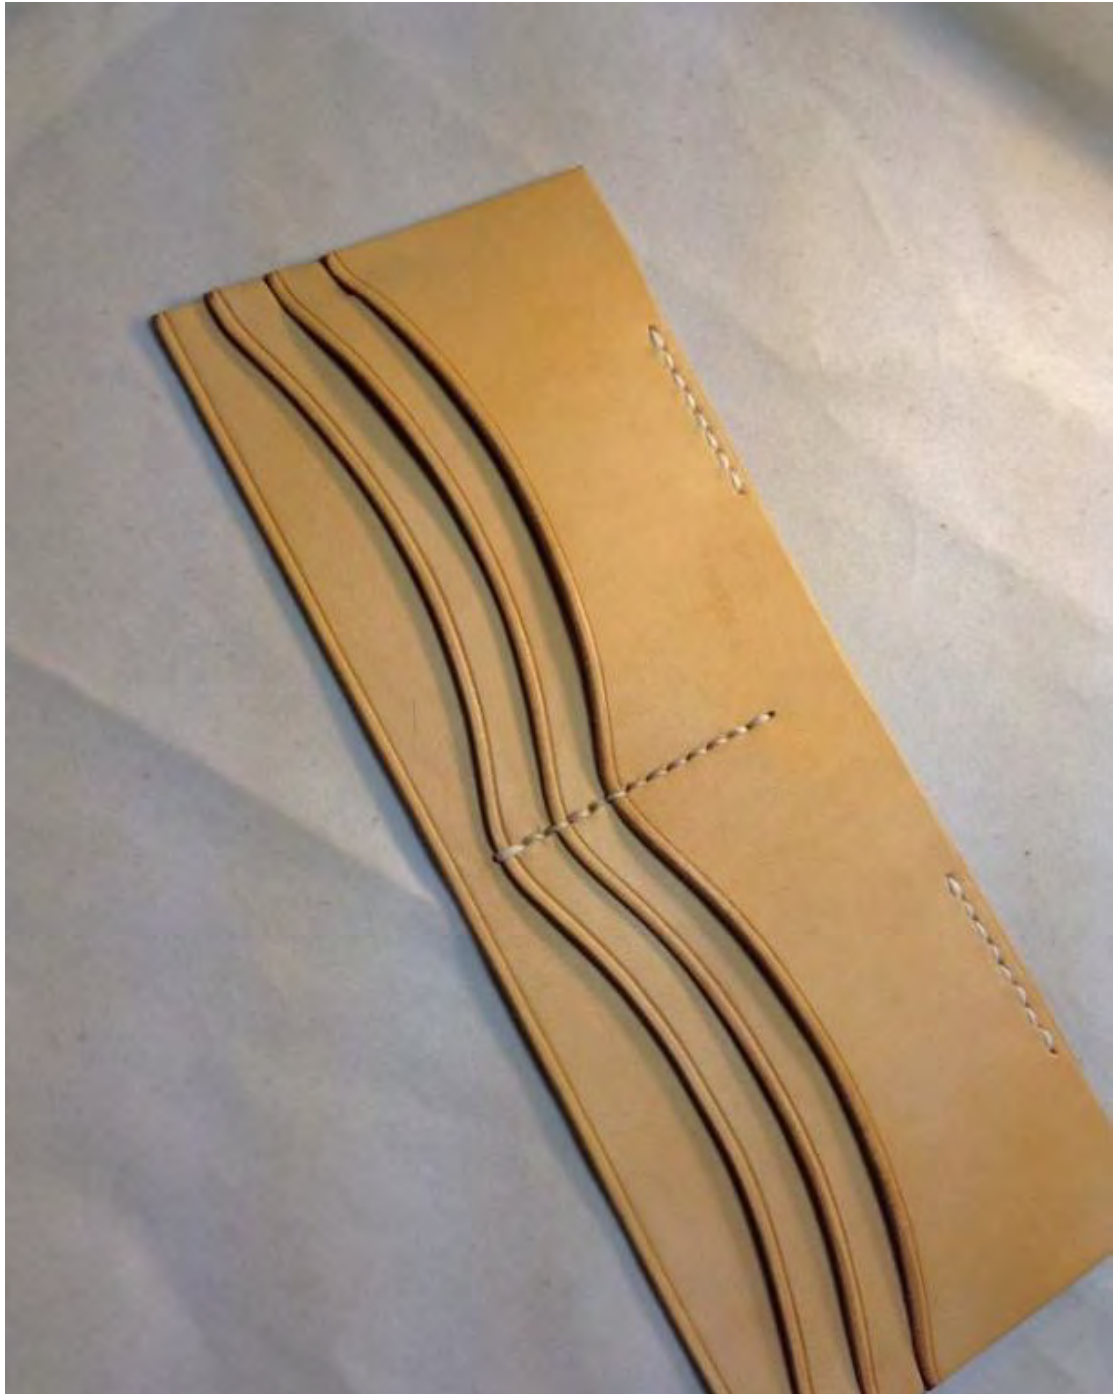

Step 5: It is time for inner part. Please polish all parts edge before going on, and you can make decoration lines with your compasses firstly. Look at the picture carefully.

Step 6: First we assemble the card slots, don't forget to sew the bottom, each piece of card slot should be sewed the bottom, then your cards won't fall down. Please sew as low as your can then you have enough space for the card.

Finished assemble, good job! A charming card slot, isn't it? There are two key step: sew a line in the middle to separated the card slot into 6 cells.

Step 7: Please align the card slot part on the surface leather, the anchor points have been marked clearly on the pattern, glue them on and put them there for further using. We go on.

Step 8: we assemble the coin purse, assemble them as picture shows. Only use one gusset here. Please sew after glue. No need to take pictures, very easy.

Step 9: This is a very import step: Assemble the finished parts together, we marked all anchor points on the pattern, so you should align and assemble in a right way.

Step 10: After glue, you can install the other two gussets, blue and sew on.

Step 11: Aha~ it almost finished after folded!

Step 12: Things become easy now. Just install the silver buttons on, you also can use copper button, that's due to you. And you can add a deer skin leather rope on **J**
